Premium Coffee

About Our Coffee

Choosing the best roasters, the highest quality Arabica coffee beans from around the world, and our roasting process, we feel our coffee bean selections create a smoother cup of coffee. To prove this, we constantly taste test to guarantee our superior flavors.

Our coffee including flavors are offered in both caffeinated and naturally decaffeinated. Our flavors use only the finest flavoring oils naturally or artificially.

Our decaffeinated coffees go through the natural Swiss Water® decaffeination process. Swiss Water decaffeinated coffee process uses the elements of water, temperature and time to create some of the most intriguing decaf coffees. Once completed the coffee is 99.9% caffeine free.

Our coffee beans are roasted in a fluid bed roaster or some refer to it as an air roaster. Instead of using a drum to tumble and roast the beans, our machine uses hot air in the chamber levitating and roasting the beans, similar to a hot air popcorn popper. The machine does not scorch or burn the delicate coffee beans since our chamber walls are no hotter than the beans, producing a much better tasting coffee experience.

Our licensing partnership with REALTREE® has allowed us to create unique coffee bag packaging designs attractive not only on retail shelves but also at camp or at home. We are confident your customers will love.... DEER CAMP COFFEE®.

Deer Camp Coffee® The Rut is one of our strongest, most sought after, and greatest tasting coffee blends you'll ever drink. It has a bold, dominant, smooth finish. Inspired from the crisp days of early autumn where white-tailed deer begin preparing for the upcoming breeding season. Bucks are busy sparring with each other, rubbing trees, and creating scrapes. Made with 100% Arabica gourmet coffee beans this dark roast will awaken those mature buck senses.
